that the study of organic chemistry requires rote memorization. This is supported through the encyclopedic nature of introductory organic chemistry textbooks and their associated solutions manuals.

However, help is available through an understanding of reactions and their underlying mechanisms.

The Pomodoro

Technique is an

excellent time

management tool for

chemistry students. It

uses a timer to help

divide study time into

work sessions, called

Pomodoro's ☐☐. Each

pomodoro consists of

25 minutes of focused

study, followed by a

5-minute break. It's a

simple formula, but it

really does get results.
