has run its course. Because cells in the brain are constantly transferring information and triggering responses, there are dozens of areas of the brain at least peripherally involved in fear.

How Fear Works | HowStuffWorks

Fear is thus triggered by an internal forecast. Sound is a primitive trigger of

Get Free Triggered By Fear A Wishingstone Woods North Star Camp Mystery

fear and the roar of a lion or the scream of a terrified child can send shivers down your spine. The sound of danger or the fear of others implies an imminent threat and so fear is triggered to elicit a desire for escape and survival.

Fear - Changing minds

I must not fear. Fear is the mind-killer.
